CERAMICA

La superficie lignea è protagonista di una storia che viene dal Nord.  
Tagliata e lavorata, verniciata e graffiata, impolverata e oliata.  
Un recupero che pareva impossibile per questo trattamento estremamente  
aggressivo, ora diventa forma di design.  
Venature, graffi da taglio, contrasti verniciato-decapato: ogni elemento  
diventa un segno distintivo capace di arricchire qualsiasi tipologia  
d'ambiente.

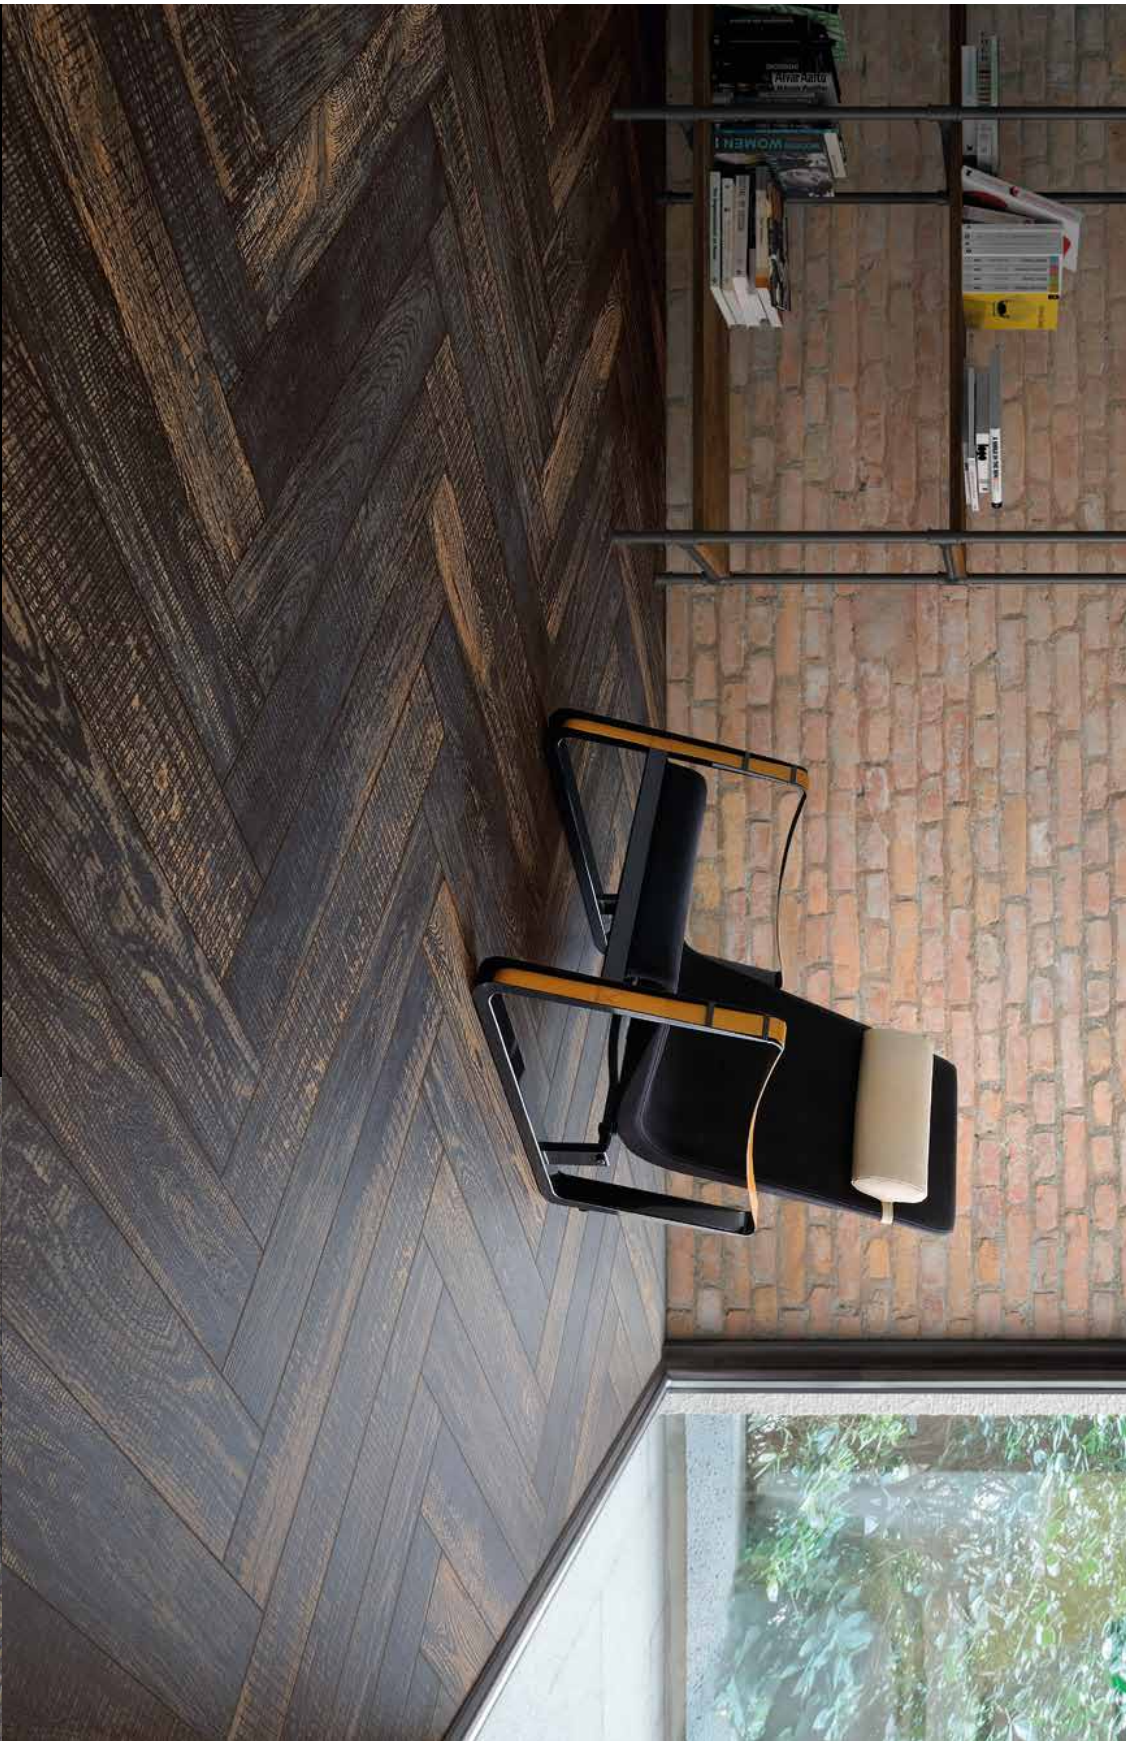

*Wooden surfaces star in a story that comes from the North. Cut and processed,  
painted and scratched, dusty and oiled.  
This apparently impossible recovery of such an extremely aggressive  
treatment, has now become a form of design.  
Grains, cuts and scratched, painted and pickled contrasts: every element  
becomes a distinctive mark able to enhance any kind of setting.*
